REASONS for ALLOWANCE

The following is an examiner's statement of reasons for allowance:

With regards to claims 1-5, a close prior art, Wang et al. (U.S. Patent No. 6,351,078), discloses most of the limitations of the claims, but fails to show at least the doped concentration of a first doped region is lower than that of a second doped region, and the first doped region serves as a single-side lightly doped drain region and the second doped region serves as a drain region.

With regards to claims 6-12, a close prior art, Yamazaki (U.S. Patent No. 6,509,616), discloses most of the limitations of the claims, but fails to show at least the length of a third doped region is less than that of a first doped region. The first and third doped regions defined in the present application's claim 6.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: US Patent Application Publication No. 2003/0089910 (illustrates an OLED with one doped area larger than the other), Inukai (illustrates a TFT with four LDDs), Koyama and Yamazaki et al. (illustrates the OLED unit connected to the drain with a LDD)
